

2006 Winter Weather Related Fatalities

There were 17 winter storm deaths in 2006, down from 34 in 2005. This number is well below the 10-year average of 41. Arizona claimed the highest death toll with 8, followed by California with 4. The most hazardous place to be in the winter of 2006 was in a vehicle, which accounted for 11 (65%) of the winter weather victims, followed by people caught outside who accounted for 5 deaths (29%). In 2006, victims were mostly younger people. The 10-19 age range and 40-49 range each numbered 3 victims; 20-29 and 30-39 age ranges numbered 2 deaths each. There were no ice related deaths in 2006, but avalanches accounted for 11 fatalities, matching the 2005 number. More males were victims (9) than females (6).
